COMMENTS: I have been a self employed midwife to the Motueka region since 2005 and am passionate about supporting women and their families through the birthing experience. I absolutely love homebirths and approximately 20% of my caseload have their babies at home. I can provide all the necessary equipment including a professional inflatable birthing pool. We also spend quite a few weeks before the birth planning the birth and postnatal period to ensure safety and an easy transition following the birth. I work closely with other midwives in the area and organise back-up support for the birth. I have three children with another baby due August 2011.
